KRISHNA MATHUR

Moradabad, UP | +91 9870694410 | krishnamathur00001@gmail.com | linkedin.com/in/krishna-mathur-a73536287

EDUCATION

Bundelkhand Institute of Engineering and Technology (BIET) Expected Graduation: July 2027

Bachelor of Technology (B.Tech) in Mechanical Engineering — Jhansi, UP

Core Coursework: CAD, Mechanics of Materials, Fluid Mechanics, Thermodynamics, Machine Design

Gandhi Nagar Public School — Moradabad, UP
CBSE Class XII: 78% | **CBSE Class X:** 87%

TECHNICAL & INDUSTRIAL SKILLS

- **CAD & 3D Modeling:** SolidWorks (Part & Assembly Design), AutoCAD (2D Drafting, GD&T).
- **CAE & Simulation:** ANSYS Fluent (Compressible Flow), ANSYS Mechanical (Static Stress, FoS).
- **Plant Operations & Maintenance:** Pneumatics, Pumps & Piping, Preventive Maintenance, RCA.
- **Productivity & Core Competencies:** MS Excel, Word, PowerPoint, Cost Estimation, Team Leadership.

INDUSTRIAL INTERNSHIPS & PRACTICAL EXPERIENCE

ITC Limited — Haridwar, Uttarakhand Vocational Trainee

- Studied automated soap production lines: mechanical drives, conveyors and packaging machinery.
- Analyzed preventive maintenance of centrifugal pumps and steam piping; documented SOPs.

UP State Road Transport Corporation (UPSRTC) — Agra, UP Vocational Trainee

- Observed overhaul of diesel engines, transmissions and steering; evaluated pneumatic brakes.
- Logged breakdown patterns in Excel to categorize failure modes and optimize servicing.

ACADEMIC PROJECTS

Air Conditioner Heat Exchanger Design & Thermal Analysis Design Project | SolidWorks

- Designed a fin-and-tube coil with copper tubes and aluminum fins to maximize heat transfer area.
- Evaluated boundary flow conditions to minimize airflow resistance and pressure drop.

Convergent-Divergent Nozzle & Mach Number Study Academic Project | ANSYS Fluent

- Built parametric 2D/3D nozzle geometries to study supersonic flow and shock formation.
- Simulated in Fluent to extract velocity vectors, pressure distributions and Mach contours.

Hartnell Governor Dynamic Modeling & Assembly Analysis Academic Project | SolidWorks

- Modeled the full governor assembly with proper kinematic constraints on levers, flyballs and sleeve.
- Evaluated equilibrium speeds and sleeve travel across RPM ranges to verify stability.

Ergonomic Bicycle Frame Design & Material Optimization Design Initiative | SolidWorks

- Engineered an ergonomic frame verifying rider posture, clearances and load transfer paths.
- Compared sustainable, cost-effective materials against steel and aluminum while retaining rigidity.

LEADERSHIP & PROFESSIONAL INITIATIVES

Senior Team Lead, Head of Powertrain Mercenary Motorsports Club, BIET

- Led powertrain design in SolidWorks: transmission layout, mounting rigidity, drive ratios and cooling.
- Coordinated Mech Motion 2.0 (Aug 2025); received Certificate of Appreciation.

Sustainable Development Head Solarpunk Corps Club, BIET

- Drove sustainable materials and lightweight frame evaluation for robotics; organized Horizon 1.0.

ACHIEVEMENTS

- **Mr. Spandan** — Title Winner, Mechanical Engineering Forum, BIET Jhansi.
- **2nd Runner-Up** — AEROWORKS 3.0, organized by The Drone Learner's Club, BIET Jhansi.

CERTIFICATIONS

Ignite India — Wadhwani Foundation 42 Hours, April 2026

Event Coordinator, Manak Utsav 2025 — BIS Collaboration Certificate of Appreciation

Organizer, Horizon 1.0 — Solarpunk Corps March 2026

Mech-Motion Workshop — Mercenary Motorsports Club Certificate of Appreciation
